noliparquet

Noli Parquet di Noli Andrea

The **Noli Parquet Workshop** arose out of an idea by the two Noli brothers, Andrea and Marco. Noli Parquet has now been on the market in Val d'Aosta, Switzerland and France for more than 45 years. Initially set up as a company for parquet layers, it then expanded until it could become a **DIRECT contractor** with the main Italian **makers of floors, stairs, boiserie, wooden fixtures and fittings, outdoor decking and floors, and swimming pool surrounds**.

Our showroom, in central **Aosta town**, has been designed so that we can help our customers in a different way from the usual wood/ceramics wholesalers.

Meetings and dealings with customers are all confidential, and customers can **view the range of products and services** we offer with all the technical explanations that may be necessary. Thus you will see **the quality of all our products** and the reasons why we only choose materials that comply with strict European standards.

We call our company a "workshop" because it perfectly describes the place where painters, tailors, and artists have been meeting since the Middle Ages, and because any product we sell has been **specially designed to meet our customers' requirements**.
