Calcestruzzi Valle d'Aosta S.r.l.

Calcestruzzi Valle d'Aosta was launched in the far-off days of 1968. On 10 April 1968 the Montrosset family, the final word in reliability and professionalism, decided to set up a company to make concrete ("calcestruzzo" in Italian).

The company grew and grew, and over time strengthened its bonds with the local community. Vehicular transport became more and more important, and we started our long experience with infrastructures.The result of all this experience and professionalism is that Calcestruzzi Valle d’Aosta is now an extremely dynamic company, and is one of the most capable in taking on the latest ideas from the world around us.

The Calcestruzzi Valle d’Aosta premises in Sarre occupy an area of approximately 290,000 square feet. We have a staff of fourteen people, and the company also sells inerts and cement conglomerate.
Calcestruzzi Valle d’Aosta works mainly in the Val d'Aosta area, where we are the market leaders. With all the experts, engineers,

builders, and workers we have, we can provide an extremely wide range of professional skills.

We also work with specialist workshops to test the performance of cement and inerts. We can go to any building site at any time to guarantee top-quality reliable work.

Our customers know they can count on the advice we give during visits to building sites.We are extremely committed to our work, and have become a synonym for seriousness, ability, and quality.

Among the many products we sell is RIBETON, a cement conglomerate using re-cycled materials.
