Giorgio Amato - Atelier per la lavorazione della pelle

This individual artisanal company is specialised in creating personalised items in leather, accessories and clothing. All work is done by hand, each item is made with natural materials (leather, deer antlers, hazel, silver, brass) and is unique.

Based on their specific requirements, clients can request products in particular colours, finish, shape or size. Because of the complexity and customisation of the work, delivery times are agreed on a case-by-case basis with the client.
