Derby Legno Coop. A R.L.

Derby Legno Ceramica is a small company producing ceramic and wooden objects, skilfully combining past and present. The basic need of people living in the Alpine regions for work and household tools led to individual approaches to working materials such as ceramics and wood. These skills were perfected over time and handed down from one generation to the next. Our ceramic and wooden tableware, gift items and household objects are entirely handmade and answer today's demands for environmental respect, modernity and tradition.
