MADE IN VDA

Eyvia Gioielli di Luca Ronco

Eyvia is a goldsmith and jewellery workshop. The artisan company was founded in February 1992 and in its workshop, with its neighbouring sales office, gold objects and jewels are created on request, original and unique jewellery designs, objects finished with diamonds and pearls of different provenance.

The atelier also carries out repairs, modifications and evaluations of jewels, setting, plating, polishing, repairs on gold watch cases and bracelets. The atelier has partnerships in the area of Valencia.

The company's philosophy is to create jewellery with personality, the product of aesthetic research, craftsmanship, but above all the inspiration of the traces left by man or nature over centuries. The word EYVIA, in the patois of the Aosta Valley, means water, a source of artistic inspiration also in the past. The Celts and the ancient inhabitants of the Aosta Valley created friezes and

decorations inspired by observing flowing water. All items are made in 750 yellow or white gold. Only natural precious stones are used. Recently the company has begun to share its passion and love for pearls of various provenance: Japan, Australia and Polynesia.

Gemological Institute of America (GIA) Expert in diamonds and pearls.

Offices in Paris (France).
