Selleria Le Cuir

The "Le Cuir" Saddlery was founded in 1979 but the company has its origins in an Aosta family that produced and sold clogs since 1871. Fabrizio Martini has worked in this traditional sector since 1985 and now manages this small company with his wife. The saddlery's principal products are cow bells with leather collars, clogs (also known as galoshes) and various types of leather products.
