

Ten Solutions S.r.l.

Ten Solutions was set up after a merger between Curti S.n.c from Pont St. Martin and Studio di Ingegneria Munari Ing. Pietro from Ivrea. This merger brought Ten Solutions a whole series of skills, workers, and installation delivery systems, and allowed us to plan, test, and certify.

Ten Solutions provides:

- Telecommunications
- Electricity
- Networking.

We also hold SOA certificates for electrical circuits and telecommunications, and for the latter we have also been awarded government certification. We are also certified installers for many different ranges of products, including: Notifier (Safety, Honeywell Group), DEF (Safety), BTicino My Home (Domotics),

TE AMP Netconnect (structured cabling), and Brand-Rex (structured cabling).

Our company also installs home and industrial electrical plant, structured cabling, LAN/WAN networks, access control, burglar alarms, CCTV, domotics, building automation, radio bridges, wireless networks, and data centre solutions (planning, testing, fault finding, technical assistance and after-sales service, outsourcing, professional training, and technical advice).

Since we at Ten Solutions bring together installation and planning skills, we can offer our customers complete solutions starting with an analysis of their needs, and then moving on to planning, installing, testing, certifying, and documenting the finished job, after which we provide maintenance and after-sales service.

Such a range of services allows us to meet all our customers' needs, from electrical plant to safety and telecommunications circuitry. The latter is particularly useful in both homes and factories, and indeed all sorts of business, in the public sector, in schools, in the performing arts, in National Trust properties, and in all sorts of sports facilities (football and rugby pitches, training grounds, and ski slopes).

Our constant attention to detail and quality in all our work goes hand in hand with the importance we give to workplace health and safety and all sorts of standards.

Certification: Quality Management System UNI EN ISO 9001:2008, issued by TÜV InterCert, N°. 09-Q-00126-TIC –SOA Certificate N°.7763/35/00, categories OS 30 and OS 19, Class III – Telecommunications Licence N°. TO/472: Installation, testing, connection, and maintenance of indoor telephone circuitry at TLC, Installers' Class TOP LEVEL.

Languages: Italian, French, English, and Spanish.
