

Eltek S.p.A.

This company, part of the Eltek Group, specialises in the planning and manufacture of moulds for plastics, and moulding and assembling plastic parts.

Eltek Plast makes electric and mechanical parts from plastic for the car and white goods industries. We mostly work in the following sectors: refrigeration (light switches, bulb holders, solenoids), washing machines (electrical and pneumatic flood-proofing devices, detergent and polish dispensers, water distribution systems, recycling files, solenoids, and and-of-cycle buzzers), ovens (door closing devices, buzzers, and flap activators), and cars (sensors, coils, and heaters).
