

GPS Standard S.p.A.

GPS Standard is a leading company in the security sector, and we are partners with many companies in the manufacture of sophisticated anti-burglar and video surveillance systems.

In our almost 40 years' experience, we have maintained our privileged position thanks to a whole series of investments in research, planning, and the application of some of the most sophisticated digital and IT technologies.

GPS Standard products can be broken down into the following six categories:

1. perimeter, a system of perimeter protection;
2. video, a video system which allows the collection, storage, and transmission of digital images in real time, which may be synchronised with our perimeter system which gives an intelligent analysis of the images it receives;

-
3. data, alarm systems, electronic alarms, electronic power supplies, and a vast range of accessories;
 4. software, our SCS program permits the centralisation of security systems and allows integration of all the different technologies being used in a supervision centre;
 5. access, a line of products to control access and to detect entry to a premises;
 6. fire, a special and traditional conventional-type fire detection system.

GPS Standard stands out from the crowd thanks to the excellent products we offer, our intelligent range of technological solutions which can be integrated and if necessary customised, top-level service from the planning stage to after-sales and testing, plus the prices we charge, our impeccable delivery system, and the courses we provide.

Research and development at GPS Standard is the best you can find anywhere in the world.

We also work with outstanding research groups at some of the world's best universities. We have branches throughout Italy, technical resources at all our branches, and offices and representatives throughout the world.
