VisaMultimedia srl

Atelier d'art graphique VisaMultimedia was created in 1992 bringing together graphic designers and visual communications professionals with over 40 years experience in the sector, joined over the years by young designers and experts in the new technologies. The agency focusses on six different coordinated sectors, combining the experience and knowledge of the designers and the technical experts which form the staff: design, internet, multimedia, photography, video, communications.

VisaMultimedia develops customised products, focussing particular attention to the analysis and planning phase, based on close dialogue with the client. Wether it is a professional dynamic website or a corporate communication project, the production of a promotional / institutional short or a photographic shoot, the approach is always aimed to reaching the shared goals, within the agreed timeframe and budget.

Today VisaMultimedia mainly operates in the region around Mont

Blanc, working on projects in Italy, France and Switzerland for private clients and public administration (often within FSE and interregional projects). The continual training of the staff and the constant renewal of equipment are one of the agency's strengths, as well as the strong motivation and passion for their work which distinguishes all the professionals of the group.
