

BYRO di Roby Perret

Roby Perret's BYRO, with 27 years' experience in installing aerials and general electronic equipment, specialises in the installation of ready-to-use solar panels, starting with preliminary planning up to and including government GSE incentives.

We also install systems for producing hydrogen to use with solar panels and other systems to use this hydrogen in fuel cells to generate electricity.

With all the experience we have gained, and using the latest technology, Byro is one of the most reliable installers in Val d'Aosta and throughout Italy.
