Ecometer S.n.c

Ecometer s.n.c. was founded in 1995 leveraging the experience of **Paolo Saudin** and **Luca Ghirardo**. Headquartered in Introd (Ao), the company operates in the **field of environmental monitoring, supplying, installing and commissioning chemical meteorological stations and operational centres.**

Specifically, the company:

- develops **software to manage monitoring networks through the acquisition, visualisation and processing of data through broadband technology;**
- creates **weather and complete monitoring stations** which are compliant with current regulations and answer the client's requirements;
- supplies and installs **boxes with advanced web cam systems to monitor remote areas;**

- supplies and installs **sensor networks and automatic warning systems triggered when snow is detected on roads;**
- develops software to manage **networks of meteorological or chemical measurements and the visualisation, processing and storage of data;**
- conducts surveys with **drones, thermographic surveys, photogrammetry.**

Strengths:

- **Motorola WNS certified**: broadband technological supply and installation;
- **qualified to pilot Remotely Piloted Aerial Vehicles;**
- **certified as level 2 Thermographers, TT method** (infrared thermography), **sector II** (industrial plants), **C** (civil and artistic heritage), **AP** (ecology);
- **certified as “SQL 4 professional”, “SQL 4 core”, “PostGIS”, “High availability replication with PostgreSQL”.**
