Fastalp S.r.l.

Fastalp is a wireless operator working **to open broadband connectivity everywhere,** even where there is no DSL service. Our network is completely independent of the Telecom Italia one, and uses dedicated radio connections via optical fibre which come into our switchboard at Pont-Saint-Martin.

Our products/services portfolio is based on the use of digital technology and the TCP/IP protocol. The services we offer are unlimited broadband flat-rate internet access, which can be short-term and charged by connection time, by condominium, HDSL, VOIP telephony, hyperfax, wifi-free and charged hotspots, housing, and local and regional CCTV systems.

Our headquarters and switchboard are in Pont Saint Martin, where you can also find the control centre for all our operations and the competence centre. Fastalp engineers and technicians have been awarded certification for some of the most important

technology in this sector (Cambium network, Mobotix, Microtic, Proxim Wireless, Deliberant, Ligowave, and VMware).
