Dell'Innocenti Lamiere - La casa del fuoco

Dell'Innocenti Lamiere S.r.l. was founded in 1975 at Saint-Christophe, and started with sheet metal work and panels for roofs and gutters.

With the passage of time, the company began work on chimneys and flues and then air treatment, and gradually moved into the field of boilers, heaters, and stoves.

Later on, we started selling steel, and as the company modernised we became increasingly involved in heating and solar panels.

Among our many services are the following: different types of roofing and sheeting, both traditional and metallic; ventilated façades, wrought iron and stainless steel, chimneys, mechanical ventilation, soling, heaters, water heaters, biomass burners, and

Cogra pellet burners.
