Edileco Soc. Coop.

edileco

Started in the Aosta Valley in 2005, the **Edileco cooperative** specializes in **eco-friendly construction and renovation**, applying green building practices and aiming at generating customer well-being along with a positive environmental impact.

In December of 2015, Rome's CFI Cooperative became a financing partner in Edileco. CFI is an institutional investor that fosters the growth of cooperative enterprises through capital injections on the basis of coherent and economically sustainable projects that safeguard the employment and present both innovative aspects and a competitive advantage.

At present, Edileco is a team made of more than 40 professionals between partner and employees, fully capable to autonomously manage every step of the productive process. Architects, technicians and systems specialists gradually joined the working partners: the result is a close-knit team ready to

tackle every job from planning & designing to the finishing touches.

The key aspects of Edileco's approach are: **quality**, **efficiency** and **sustainability**. Forecasts of lead times and costs are guaranteed to be accurate.

The strengths of Edileco's green building products are the following:

- **Energy Efficiency**
- **Thermal Insulation**
- **Use of Renewable Energies**
