Centro Olos

The Centro Olos aims at becoming a datum point for well-being and skin health. Our skin is a vital organ from a physiological and a psychological point of view, and is important because it sends out an image and shows how happy we are. It communicates with other people, and shows them what is happening inside us.

Taking care of our skin, teaching people how to treat it, making it look better, and helping people to have healthy skin are the main tasks facing this health centre.

Continuously updating the quality of the equipment we use and the professional skills of everyone working at his institute are an attempt at ensuring all the care and attention our customers need.

Among the services which Olos provides, let us mention:

- a professional beauty centre - face and body treatments

- a slimming centre - Vitalybraa
- relaxation centre - manual massaging
- a Pilates and Rehab-Pilates Studio

Olos is licensed to provide Intraceutical Oxygen Infusion and LPG – Endermologie Lipomassage.
