Società Industriale Rinnovabili S.r.l.

Società Industriale Rinnovabili S.r.l. - GREENTERRAE provides highly technological solutions for **energy efficiency** and for buildings in mountain areas. Planning, which always gives a good **return on economic investments**, tries to meet each client's individual needs (whether they are a private individual, a housing association, a small company, a business, or an hotel) at every stage of the process (diagnostics, planning, completion, after sales) for **upgrading work**, **LED illumination**, and energy production using alternative sources.

Our three keywords are **energy saving, well-being, and design,** and they can be heard throughout every project we look after.

- LED illumination, to give immediate savings on your next electricity bill
- Solar fireplaces, controlled ventilation, under-floor heating, building insulation, green roofs, and green walls, for dwellings, workplaces, or business premises
- Ready-to-use plant for in-house energy production:solar

panels, cogeneration, biomass, geothermal power, solar heating.

Community registration at OAMI of the SIR, GREEN TERRAE and ENERGY DESIGNERS brands.
Certification currently underway.
Languages: English, French, German, and Portuguese.
