Agri Tecnica Valdostana di Guolo Richard

A strong and established presence in the Aosta Valley with many years experience passed on within the family, **Agri-Tecnica Valdostana**, created to design and create sheds and equipment for cattle, goats and sheep, has over the years expanded its range with an increasing presence in the **creation and the maintenance of medium-lightweight and heavy metal carpentry,** metal doors and windows, load-bearing structures, gangways, bridges, steps, fencing and railings, the supply of zinc-coated or painted materials.

It is expanding and based on increased demand from the industrial sector, it is **investing in technology and qualified staff** so that it can guarantee a fast response time and superior quality.

At present the company mainly works in collaboration with many construction firms in the region, contributing to the creation of **irrigation systems**, **artificial snow systems** and **ski lifts**. It can

offer **personalised solutions** both for simple structures and for complex projects, from making the product to its installation using its own vehicles, equipment and specialised workers.
