

Cogne Acciai Speciali S.p.A. “Socio Unico”

At Cogne Acciai Speciali we are one of the world's biggest producers of special steel and large-scale stainless steel.

Our purpose is to specialise in niche markets, so that we can provide fast, cooperative, and professional solutions to all the needs of all our customers.

With our special Research and Development Centre, made up of qualified experts and engineers, Cogne Acciai Speciali has been able to diversify manufacture and offer a complete range of top-level products which fully comply with international quality standards. In this way, thanks to our long experience and our R&D Centre we have been able to improve our manufacturing process, thanks in part to our use of the latest technology, and we have received important certification from UNI EN ISO 9001:2000, ISO TS 16949, and Statoil.

Our steels go from Austenite to Super-Austenite, from Martensite to Precipitation-Hardened, up to and including Duplex and Superduplex.

Products: Rods, bars, semi-finished, automotive, valve steels, tool steels, and improved adherence bars.
