International Industry Fair 2022

SPACE FOR KNOWLEDGE TRANSFER, DISCUSSIONS AND NEW BUSINESS PARTNERSHIPS

Dear business partner,

In the last few years, the International Industry Fair in Celje has certainly became the largest and most important biennial fair in the fields of engineering, tool industry, welding and cutting in southeastern Europe, which is evidenced by the rapid increase in the number of visitors and exhibitors in recent years. In the last edition of the show in 2019, we recorded a 25 per cent increase in the number of visitors in comparison to 2017 and we hosted exhibitors from 32 countries around the world, which further proves that the International Industry Fair is an important regional fair.

If you wish to become part of our success story, we invite you to reserve a spot to present your company early on. The International Industry Fair is an incredible opportunity to quickly and cheaply gain customers from the entire south-eastern Europe and even further, to present new products or services, to meet with customers and to establish comparisons with competitors for all those, who work in the mentioned fields. In 2019, we thus recorded a 100 per cent occupancy of all showrooms. You should therefore hurry so you do not miss this opportunity which comes only once every two years. See you there.

mag. Robert Otorepec
Executive Director

2019 Fair statistics

+20 %
in comparison to 2017

350 direct exhibitors, 900 brands from 32 countries

+25 %
in comparison to 2017

15,193 expert visitors in 4 days

100 %
showroom occupancy

16.785m²
7 technically perfected fair halls

EXHIBITORS

99 % More than 99% of exhibitors rated their presentation as successful or very

85 % 85% of exhibitors has already confirmed their attendance on the International Industry Fair 2021.

55 % 55% of exhibitors concluded a new business agreement at the Fair.

50 % More than 50% of exhibitors rated the Fair as BETTER than the previous one.

43 % 43% of foreign business visitors (from Austria, Bosnia and Herzegovina, Czech Republic, Montenegro, Croatia, Italy, Japan, China, Kosovo, Hungary, Germany, Romania, North Macedonia).

EXHIBITION PROGRAMME

TOOL INDUSTRY AND ENGINEERING

- Processing centres, milling and drilling machines
- Turning machines, lathes and lathe centres
- Grinding machines
- Machine tools for modification
- Machine tools for cutting
- Machine tools for etching
- Plastic extrusion machines
- Plastics milling machines
- Equipment and tools for plastics processing
- Deburring and edge deburring
- Drilling and gluing machines
- Other machine tools and machines
- Components, parts and additional equipment
- Industrial software and engineering
- Coolants and lubricants
- Microprocessing
- Metrology, control and testing
- Quality assurance, control and testing
- Safety equipment and protection
- Installation management and maintenance

WELDING AND CUTTING

- Welding machines, cutting machines and soldering machines
- Basic, additional and auxiliary welding and soldering consumables, materials and tools
- Safety equipment and protection
- Technical gases and warehouse equipment
- Certification, quality assurance and control

MATERIALS AND COMPONENTS

- Thermoplastic granules
- Raw materials, additional materials and auxiliary materials
- Advanced materials
- Semi-finished products
- Resins, coatings and glues, epoxies and encapsulates

ADVANCED TECHNOLOGIES

- Industrial atomisation
- Industrial robots and tool handling technology
- 3D printing and prototyping
- Production of CAD/CAM software
- Lasers and laser systems
- Reverse engineering
- Industrial marking
- Software and solutions for managing the product life cycle

Celje Fair, 5-8 April 2022 Slovenia

Celje Fair – in the heart of the region with modern information and communication technologies for efficient organisation of the fair presentation and attendance.

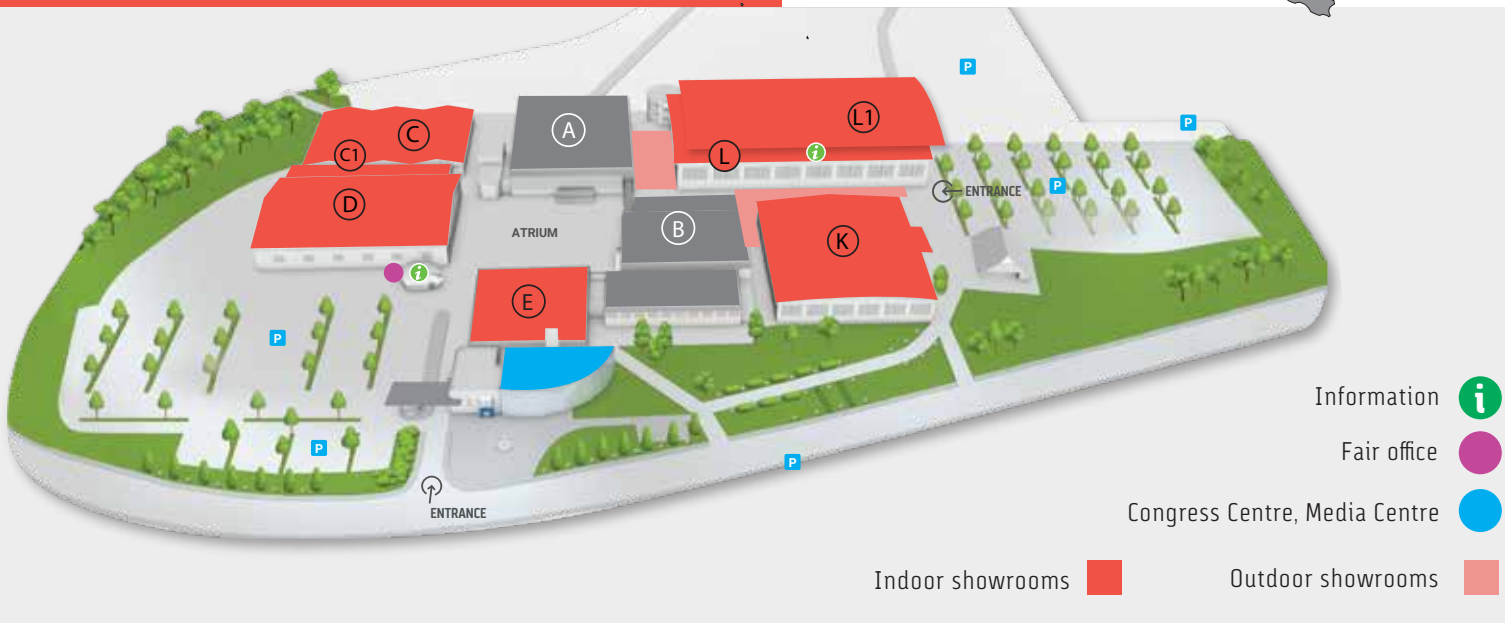

GOOD TO KNOW!
Use the opportunity for lower showroom prices by registering early by 15 November 2021.

Deadline for applications is 14 January 2022.
