

TEKTITE: DIGITAL ECONOMY 2023

Online Open Innovation Brokerage Event

March 28th – 31st (4Days) 2023

Why DIGITAL ECONOMY?

Digital innovation refers to the application of digital technology to existing business opportunities. Ideas such as digital transformation and digitization are closely related to the concept of digital innovation. Businesses that are digital innovators consider new ways to solve old problems.

Online Event

Unlike offline, virtual events enable us to save time, monetary cost and travel. So DeltaTech-Korea Ltd. Holds brokerage event same as physical space in online virtual space.

Technology & Business Opportunity

TEKTITE is aimed to interconnect innovation seekers, solution providers, intermediaries and investors with the aim of creating Technology & Business Opportunity.

DEMAND RESPONSE SEARCH

DRS is a sniper-targeted campaign to reach **a pre-defined audience (sales pipeline)**, enabling solution providers to get engaged directly with the decision-makers of innovation seekers and/or investors. This approach ensures that target audiences get the right message/offer at precisely the right time and place ensuring that no shots are wasted in the process.

DRS is a micro-targeting approach to create EOI(Expression of Interest) which arranges a B2B meeting in person between solution providers and innovation seekers. Particularly DRS is quite popularly used for prior promotional scheme to invite more innovation seekers towards technology supplier's booths.

SMK = Sales Material Kit
 TO = Technology Offer
 QPD = Quick Pitch Deck
 OI = Open Innovation

TECH SCOUTING

In global companies open innovation managers are keen on searching technologies interested as well as building up innovation networks across advanced S&T nations. As such TSS allows them for connecting with inventors specialized in technology requests and TTO managers in universities and/or research institutes abroad.

Since 2000 DTK has provided global companies with such an open innovation services in Korea, which is specialized at technology searching & scouting as below:

TSS is an open innovation service to edit the booklets containing hot technologies and inventors the global OI managers are looking for. TSS enables OI managers to understand the technology trend and identify technology providers such as university researchers, startups and established companies, which could be the first step to develop business with Korea.
