

Energy-related partnering opportunities

December 2024

Renewable energies

Technology offer TOGB20241127009

[Efficient Solar Thermal Technology for Industrial Heating Processes seeking trial partners from sunny climates to feedback on concentrated solar energy technology.](#)

Technology offer TOSI20241209007

[A Slovenian research institute offers electrocatalysts for hydrogen formation reaction, under investment, commercial or research and development cooperation agreements.](#)

Business Offer BODE20241216034

[Mobile solar power plant for flexible and self-sufficient power generation from green energy sources](#)

Business Offer BOTR20241220020

[A Turkish company specializing in renewable energy technologies, particularly in biogas and landfill gas solutions is seeking commercial partners.](#)

Business Offer BOTR20241223008

[Turkish spin-off company produces tier 1 solar panels is looking for distributors and customers from europe under supplier and commercial agreement with technical assistance.](#)

Business Offer BOUA20241217008

[Ukrainian company for the production of linear wind generators for power generation in suburban areas.](#)

Business Offer BOTR20241225004

[Focusing on developing innovative, environmentally friendly biotechnology solutions, this company is looking to establish commercial collaborations.](#)

Technology offer TORO20241122024

[AI-Powered Decision Support System for Sustainable Renewable Energy Infrastructure Planning and Environmental Impact Monitoring](#)

Business Offer BOTR20241230003

[A Turkish company specialising in the production of solar water heating systems offers a commercial agency or manufacturing agreement.](#)

Other topics (energy conservation, storage, distribution, etc.)

Technology offer TOES20241127011

[Green revolution in industry: Hybrid catalysts for a cleaner and more sustainable future.](#)

Technology offer TOGB20241126012

[UK based patented electrolyser company seeks commercial/projects partners who are looking into building a hydrogen economy or infrastructure that supports the hydrogen targets set by 2050](#)

Technology offer TOIT20241206011

[Safe, solid, high-performance Italian supercapacitors for applications in the automotive, marine, and aerospace sectors.](#)

Business Offer BOFR20241205004

[French SME Collects end-of-life electric vehicle batteries and is looking for partners interested to buy and recycle or reuse these batteries.](#)

Research & Development Request RDRDE20241206017

[HORIZON-CL5-2024-D3-02-02: Industrial partners sought to validate the sustainable electrocatalytic production of ammonia used as fuel and for fuel cells](#)

Technology offer TOES20241212008

[A Spanish developer of innovative thermal energy storage systems seeks partners for developing demonstrative projects in Europe for industrial heat decarbonisation and commercial agreements with technical assistance.](#)

Technology offer TOKR20241218001

[A Korean startup having liquefied ammonia electrolysis hydrogen extraction technology is seeking commercial and R&D partners for system validation and commercialisation adapted to European specifications](#)

Technology request TRIN20241219009

[An Indian investor and project developer is seeking to partner with a technology provider for innovative technology solutions in the green hydrogen space to setup operations in India](#)

Business Offer BOTR20241225008

[This company, which is a technology development zone, carries out design and consultancy, battery production, battery and battery sales and energy storage solutions and wants to make commercial cooperation in this field.](#)

Business Offer BOES20241227010

[Distribution or commercial partner sought for High-Voltage and Extra-High-Voltage Cable Monitoring Solutions based in current fiber optic sensors](#)
